

Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

(ISIN: A Shares - IE00BD5HPH84)

Vietnam Equity (UCITS) Fund (the “Fund”), a sub-fund of DC Developing Markets Strategies p.l.c. The Manager is Waystone Management Company (IE) Limited (the “Manager”)

The Investment Manager is Dragon Capital Management (HK) Limited (the “Investment Manager”)

Objectives and Investment Policy

The Fund is designed to provide investors with broad exposure to Vietnam’s public equity markets and seeks medium to long term capital appreciation through investing primarily in securities issued by Vietnamese companies that are traded on the Ho Chi Minh Stock Exchange, the Hanoi Stock Exchange, the Unlisted Public Company Market (UPCoM) or another recognised market, although up to 10% of the Net Asset Value of the Fund may comprise securities that are traded over the counter or are unlisted.

The Fund may also hold cash or other short-term investments such as commercial paper or certificates of deposit. Where the Investment Manager considers it prudent to do so (for example, when the Investment Manager is unable to identify suitable investment opportunities or in times of falling markets or market volatility), the Fund may hold more cash or other short-term investments than other assets.

The Fund will not invest in derivatives of any kind, other than warrants (including covered warrants), rights and convertible bonds. Warrants and rights are securities that allow the Fund to obtain exposure to, or acquire, the underlying equity or other securities of an issuer. Convertible bonds are a type of bond that the holder can convert into a predetermined number of common stock or equity shares.

The Fund will retain any income generated which has the effect to increase the value of the shares.

The Fund will not use any hedging, arbitrage and leverage techniques.

The Fund will be actively managed, subject to the stated investment objectives and policies, using a disciplined stock selection approach that is based on a regular assessment of economic and structural growth drivers, value metrics and corporate governance aspects. The Fund will not track or benchmark against any index, notwithstanding that the Vietnam Ho Chi Minh Stock Index (“VN Index”) is used to show the performance of the Fund in comparison to the Vietnamese market. The Investment Manager’s investment decisions will not be influenced in any way by the VN Index.

Investors may subscribe and redeem shares in the Fund on any business day.

The Net Asset Value of the A Shares will be expressed in US Dollars.

For full investment objectives and policy details investors should refer to the prospectus and supplement.

Recommendation: This Fund is suitable for investors who can afford to set aside the invested capital for the medium to long term (at least 3-5 years)

Risk and Reward Profile

The shaded area above shows the A Shares’ risk categorisation. A higher number means a greater potential reward but also a greater risk of losing money. The categorisation is based on historical performance data. It is provided for illustrative purposes. It may not be a reliable indicator of the A Shares’ future risk profile and is not guaranteed to remain unchanged and may shift over time. Other UCITS funds may have significantly different risk profiles in spite of having the same risk categorisation as the A Shares. The lowest risk categorisation does not mean risk-free.

The A Shares are categorised in this risk level due in particular to the relatively high volatility in Vietnam’s public equity markets since their inception.

Certain Other Risks

Investments in securities may fall in market value due to adverse market and economic conditions, perceptions regarding the industries in which the issuers of securities held by the Fund participate and the particular circumstances and performance of particular companies whose securities the Fund holds.

Investments in securities may be subject to wide and sudden fluctuations in market value, with a resulting fluctuation in the amount of profits and losses. In addition, relatively small companies in which the

Fund may invest may lack management depth or the ability to generate internally, or obtain externally, the funds necessary for growth.

Investments will be made in securities denominated in currencies other than the Base Currency (US Dollar) and any income received from such investments will be received in the currencies of such investments, which may fall in value against the Base Currency of the Fund.

Assets of the Fund may be held in the name of the relevant custodian or sub-custodian rather than the Fund and some protections may be lost as a result.

Investments in emerging markets such as Vietnam may carry risks with failed or delayed settlement and with registration and custody of securities. Companies in emerging markets may not be subject to accounting, auditing and financial reporting standards or be subject to the same level of government supervision and regulation as in more developed markets. Lack of liquidity and efficiency in certain stock markets or foreign exchange markets may mean that from time to time there may be difficulties in purchasing or selling securities or foreign currencies.

An investment in the Fund should not constitute a substantial proportion of an investment portfolio and may not be appropriate for all investors. There can be no assurance that the Fund will not incur substantial losses, and it is possible that you may lose the entire amount invested.

For full details of the Fund’s risks, please refer to the section ‘Risk Factors’ in the prospectus.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	N/A
Exit charge	N/A
This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out	
Charges taken from the Fund over a year	
Ongoing charges	2.4%
Charges taken from the Fund under certain specific conditions	
Performance fee	N/A

The Board have imposed a fee cap on ongoing charges of 2.5% borne by the A Shares. The fee cap will operate annually, unless the Board in their absolute discretion decide to cease its operation, in which case Shareholders will be provided with 30 calendar days' notice. The annual report for each financial year will include details on the ongoing charges. The ongoing charges figure excludes portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling units in another collective investment undertaking. The ongoing charges figure is based on expenses for the year ended 31 December 2025.

Please refer to the Fees, Costs and Expenses sections of the prospectus and supplement for further information, which is available at www.dragoncapital.com.
